

GK 4053

Utfylling ved Hamar stasjon.

Stabilitet av fylling

Pel 1 - Pel 4., typ. GK 4053,1

Beregningene viser at stabiliteten vil være dårlig for den projesterte utfylling. Sikkerheten mot utglidning med tog på fyllingen er bare ca 1,3, som er et minimum for en permanent fylling ~~som dette~~.

Stabiliteten foreslås øket mellom pel 1. ~~og~~ pel 4 ved utlegging av motfylling i ca. 1 m's høyde og 5 m's bredde utenfor hovedfyllingen, (ca. $20,0 \cdot 40 = 800 \text{ m}^3$).

Profil pe11.

$$M_{dr} = 10 \cdot 4.8 + 5.7 \cdot 3.4 \cdot 1.8 \cdot 4.8 + 0.5 \cdot 4.5 \cdot 3.4 \cdot 1.8 \cdot 0.6 = 48.0 + 167.4 + 8.3 = 223.7 \text{ tm/m}$$

$$M_{st} = \tau \cdot \frac{140}{180} \cdot \pi \cdot 8^2 = 156.4 \cdot \tau$$

$$\tau_{mob} = \frac{223.7}{156.4} = \underline{\underline{1.43}} \text{ t/m}^2$$

Uten mobillast: $\tau_m = 1.12 \text{ t/m}^2$

$F = 1.3$ Krever $S_u = 1.43 \cdot 1.3 = \underline{\underline{1.86}} \text{ t/m}^2$

$S_v' = 1.12 \cdot 1.3 = \underline{\underline{1.46}}$

Utfylling vogulast.

Profil pell 1

$$M_{dr} = 10 \cdot 9,0 + 9,0 \cdot 3,4 \cdot 5,8 \cdot 1,8 = 90,0 + 319,5 = 409,5 \text{ tm/m}$$

$$M_{st} = \xi \cdot \frac{129}{180} \pi \cdot 10,8^2 = 262,6 \cdot \xi$$

$$\xi_{mob} = \frac{409,5}{262,6} = \underline{\underline{1,56}} \text{ t/m}^2$$

$$F = 1,3 \text{ krewer} \quad S_0 = 1,56 \cdot 1,3 = 2,07 \text{ t/m}^2$$

Utfylling for
Vognlastterminal
Hamar.

$$① \quad 5.0 \cdot 3.4 \cdot 1.8 \cdot 5.6 = 171.4$$

$$② \quad 2.4 \cdot 7 \cdot 2.4 \cdot 1.8 \cdot 1.5 = 21.5$$

$$③ \quad 10 \cdot 5.5 = \frac{55.0}{M_{dr} = 247.9 \text{ t/m/m}}$$

$$M_{st} = \frac{141}{180} \pi \cdot 8.3^2 \cdot \bar{\epsilon}_m = 169.53 \cdot \bar{\epsilon}_m$$

$$\bar{\epsilon}_m = \frac{247.9}{169.5} = 1.46 \text{ t/m}^2$$

$$\text{Utem mowilant: } \bar{\epsilon}_m' = 1.14 \text{ t/m}^2$$

$$S_{u_{gr}} = \frac{2.5 \cdot 2.6 + 2.4 \cdot 2.3 + 2.3 \cdot 1.10 + 2.6 \cdot 0.5}{2.6 + 2.4 \cdot 2 + 2 \cdot 3.1 + 2.6}$$

$$= \frac{33.32}{19.8} = 1.68 \text{ t/m}^2$$

$$\bar{\epsilon}_s = \frac{1.68}{1.46} = 1.15$$

$$\bar{\epsilon}_s' = \frac{1.68}{1.14} = 1.48$$
